Kpp. IPB Baranangsiang 4 Kota Bogor, Bogor Utara, Tanah Baru, 16154

I am a Computer Engineering graduate, recognized as the Best Graduate at BINUS University's 68th graduation. I bring professional experience in software development, IT support, and teaching, which has equipped me with both technical expertise and strong problem solving abilities. I specialize in building responsive web applications using frameworks such as React, Vue.js, Express.js, and Spring Boot, and have hands-on experience with IoT development involving cloud platforms, integrated systems, and real-time data handling, where I built a digital signage solution to display restaurant menus. I strengthened my communication and teamwork skills as a Python Teaching Assistant and through collaborative development projects. With a strong commitment to continuous learning and innovation, I am eager to grow in a collaborative environment and contribute to solutions that address business needs and create lasting value.

## Work Experiences

### PLN Icon Plus - Jakarta, Indonesia

Jan 2024 - Jun 2025

#### Junior Software Engineer

- Assisted in migrating the company's business process models from Microsoft Visio to SAP Signavio, improving process integration.
- Built a web application to manage and approve rooftop solar (PLTS Atap) quotas for individuals, businesses, and government entities.
- Developed a website for ESDM to distribute free electric cooking appliances for underprivileged communities.
- Engineered responsive web applications optimized for seamless performance across all devices and screen sizes.
- Identified and resolved software bugs, enhancing functionality and improving user experience.
- Maintained and updated software applications to ensure compatibility with evolving technologies.

### Pacmann - Jakarta, Indonesia

Mar 2023 - Jul 2023

#### Part-time Teaching Assistant Python

- Delivered tutoring sessions for 5–20 participants up to three times weekly, earning an average rating above 4/5.
- Supported live classes as a technical operator, ensuring stable platforms and smooth session flow.
- Reviewed and graded project submissions, providing constructive feedback to enhance learning outcomes.
- Moderated a Discord community of 180+ members, fostering engagement and facilitating discussions.

### PT. Boon Software - Jakarta, Indonesia

Feb 2022 - Aug 2022

#### IT Support Internship

- Provided technical support for application servers through configuration, installation, and troubleshooting.
- Automated log file management by implementing Apache log rotation, saving manual effort and improving IT team efficiency.
- Monitored and maintained up to 16 client servers daily using remote tools, reducing downtime and ensuring system availability.
- Diagnosed and fixed network problems, ensuring stable connectivity for users.

## Education Level

### Universitas Bina Nusantara - Jakarta, Indonesia

Jul 2019 - Aug 2023

#### Bachelor of Computer Engineering, 3.67/4.00

- Research Project: Design of Digital Signage System for Menu Display in Food and Beverage Industry.
- Honors: Recipient of the Best Graduate Award in Computer Engineering, Class of '68.

## Organisational Experience

### Himpunan Teknik Komputer Binus University - Jakarta, Indonesia

Feb 2021 - Feb 2022

#### Coordination staff of event division

- Participate in an event called P2M (Pengabdian Pada Masyarakat) as a committee by creating an educational video.
- Hold an event called "CEAFO: learn IoT through security improvement with ESP-32" as a person in charge.

## Skill, Certificates & Other Experience

- **Programming Language:** C++, Java, Python, Typescript, JavaScript, HTML, CSS, and SQL.
- **Library and Framework:** React, Vue.js, Express.js, Spring Boot, Socket.IO, Drizzle ORM, Oracle, MySQL, MongoDB and Linux.
- **IELTS** 🇬🇧: IELTS 6.5 (IDP), all bands 6+.
- **Best Graduate Certificate** 🏆: Recognized as the Best Graduate in Computer Engineering for the 68th graduating class.
- **Korea-ASEAN Digital Academy** 🇰🇷: Completed 250 hours of training in AI, web development, cloud, data, and UI/UX.
- **Practical Real Business Application for Data Engineer by Komdigi x DqLab** 🇮🇩: Certificate of course completion.
- **Quality Assurance by MySkill** 🇮🇩: Completed a full learning path with professional skill in quality assurance.
- **Frontend - React by MySkill** 🇮🇩: Completed a full topic with specialization in frontend React.
